DETAILED ACTION

Claim Objections

Claim 10 is objected to because of the following informalities: Claim 10 depends from claim 1, but discloses a hygiene product. Claim 7 discloses a hygiene product. For purposes of examination, it will be assumed that claim 10 depends from claim 7. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Hansen et al. (6,521,087).

With respect to claims 1-3, 5-8, and 10, Hansen discloses a superabsorbent material comprising superabsorbent particles. A binder material consisting of gluconolactone (column 19, table 2) is bonded to the surface of the superabsorbent particles (figures 10 and 11; column 3, lines 46-48). Hansen discloses the superabsorbent material can be used in hygiene products such as diapers (figure 8).

With respect to claims 4 and 9, Hansen discloses the binders are present in the weight percent of 0.5-80% of the total weight of the fibers and superabsorbent material.

Art Unit: 3761

Hansen further discloses the superabsorbent material is 3-80% by weight of the pulp fibers and particulate material. The percent of binder would therefore be between 1-20% of the superabsorbent material (column 20, line 66 through column 21, line 5).

Response to Arguments

Applicant's arguments filed October 6, 2003 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., odor control, inhibition of bacterial growth, and the type of chemical binding) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Hansen et al. (6,521,087) disclose all aspects of the claimed invention. Hansen discloses superabsorbent material bonded to a binder (column 3, lines 46-48). The binder is bonded to gluconolactone (column 19, table 2), and therefore the gluconolactone is chemically bonded to the superabsorbent material. Hansen therefore discloses a superabsorbent material containing a lactone.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3761

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
